Stormhammers' ideals—might actually be an agent for SAFE, the fragmented covert operations command of the equally splintered House Marik. Thanks to the convoluted nature of SAFE today, however, it remains unclear which former Free Worlds faction is behind this infiltration—and to what purpose.

Commentary

One of the first Clan 'Mechs to see action in the Inner Sphere, the *Vulture* brought devastating firepower to the field in a surprisingly agile package. Armed with a quartet of lasers that were backed up by heavy long-range missile launchers, the *Vulture* (known among Clan warriors as the *Mad Dog*) looked every bit the bird of prey.

Originally manufactured for Clan Smoke Jaguar, SJ2056-19G saw action on Luthien and Tukayyid during the early years of the Clan invasion. It was captured by Inner Sphere troops during Operation Bulldog, which preceded the ultimate destruction of the Jaguar Clan. Among the ragtag remains of the Com Guards who rallied to Devlin Stone's banner, this machine's pilot brought it with him into Stone's new Republic. Latonya Lyons has nicknamed this 'Mech "Raubvogel," a German word meaning "bird of prey."
